DIGITAL MARKETING SCHOOL SUCCESS STORY FEEDBACK:

What drew me to the course was the experience that the tutors bring. It's so important to be working with and learning under industry professionals because they've got the experience and the contacts to support you once you've finished the course. NZIE was so valuable because it [taught me] a lot of practical skills.

I felt confident finishing a diploma where I could launch into the workplace and know how things get done and how to do them.

My [university] degree was very theory based... That was a huge difference between doing this diploma and that degree.

Social media is so dynamic. You could learn things one week, and then within a month, something else has come into play, or there's a new system. For me, the fundamentals [taught in the Diploma] is what really stood out.

They know the tools, and they know, beyond just the theory of marketing, how to actually execute on the campaign for our business.

And so that's been really valuable.

As a direct result of our experience with NZIE so far, we place a lot more trust in a recommendation than I would place in other educational institutions in the field. So, kudos to NZIE and what they have done in terms of developing coursework.
